DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-4, 6, 8-10, 14 and 17-20 have been considered but are moot in view of the cancellation of those claims and the election of species requirement prompted by the amendment to the claims.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on April 16, 2009 was filed after the mailing date of the non-final action on September 24, 2008. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Election/Restrictions

3. This application contains claims directed to patentably distinct species. Applicant must first elect a species from the following: (1) an article having a first side ear lateral tensile modulus that is greater than or about equal to an intermediate lateral tensile modulus of the article and (2) an article having a first side ear lateral tensile modulus that is equal to an intermediate lateral tensile modulus of the article. Upon electing a species applicant must then also elect from one of the following subspecies: (a) a second side ear lateral tensile modulus that is greater than or about equal to the intermediate lateral tensile modulus, and (b) a second side ear lateral tensile modulus that is equal to the intermediate lateral tensile modulus. The species are independent or distinct because claims to the different species recite the mutually

exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 21 and 31 are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

4. A telephone call was not made to request an oral election to the above election requirement due to the complexity of the requirement.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
